04. TEST AND LEARN

1. What to you think about the buzz logo and the connection to the kea design guide?

Connection to kea is not so good in general, I like the home button but the bee logo is a bit confusing.

2. Who do you think this version of fronter will appeal to the most?

Definitely students and it will be the most useful for them.

3. How do you feel the comment section of the portfolio would help students, or would it help at all?

It would definitely be helpful. Great way of gathering feedbacks and doing peer reviews.

4. Are the stars appealing?

I like it, gives a nice flow maybe needs some arrows. Nice way of saving your favourites.

5. Do you find entrance to the different rooms confusing?

No, but maybe add some different headings to the different rooms.

6. What do you think the general purpose of the site is?

Mainly to improve communication, it is a good tool to seek help and feedback and a great way to do peer reviews.

7. What is your opinion on the overall design of the site?

I like the stars, it is very user friendly, I like the gradient buzz and possibility of some extra information maybe I would add a chat.

8. Do you think we should keep the kea logo as it is on the site?

I think so because you feel like you are at your school's site as fronter should be, even though it is used by all the institutons there should be a difference between each.

9. Do you think the portfolio should be made as an individual choice to make or everybody must have one?

I think that there would probably be some people who wouldn't like to expose much but I think it would be very useful for everybody so I would make it a choice but I would also recommend it to everyone.

10. Would you let teachers be able to access all the portofolios and leave feedback or would it be better to keep it as a student thing?

Maybe students would feel more freedom and post more without the teachers in it, but maybe also keep some visible to the teachers as well it could be usefull.
